

# Poll statistics

1

How much did you improve your knowledge about types and benefits of renewable energy?

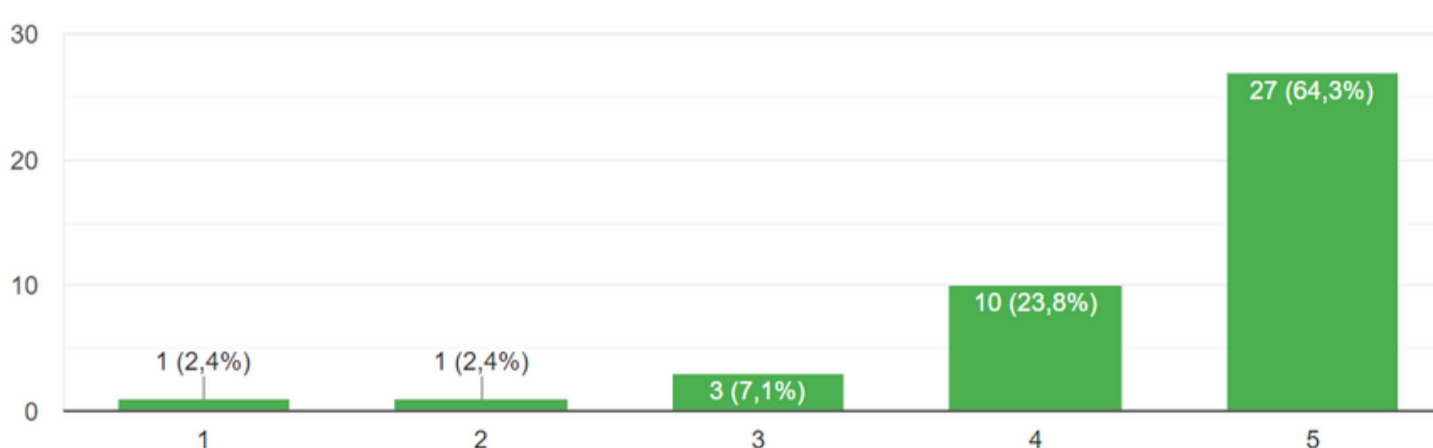

42 odpowiedzi

2

How much did you improve your knowledge about the history and traditions of Siena?

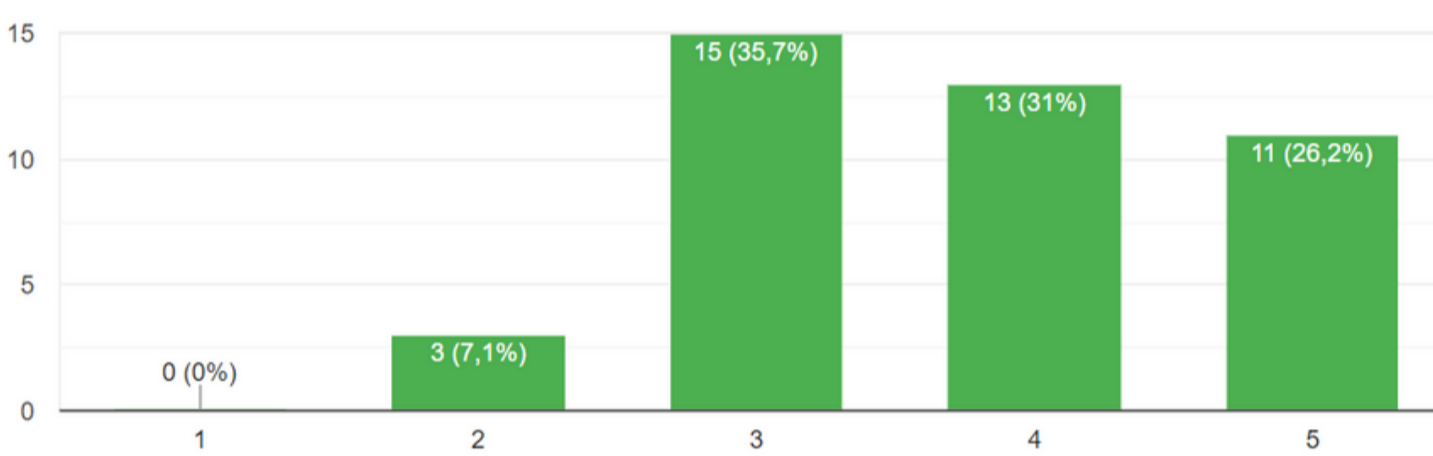

42 odpowiedzi

3

How much did you improve your knowledge about sources of renewable energy in each partner country?

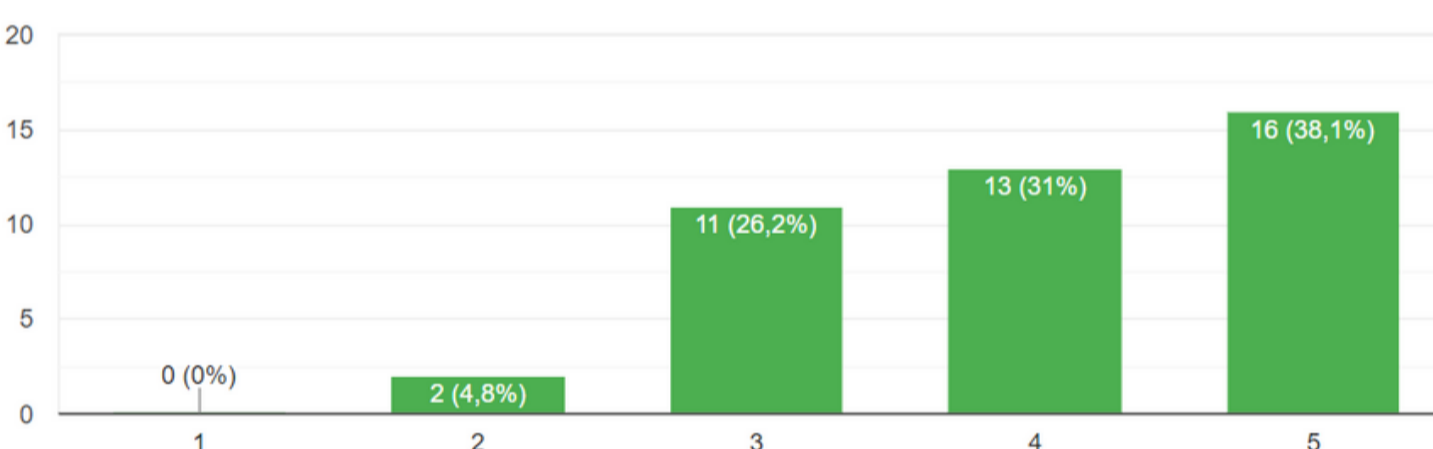

42 odpowiedzi

4

How much did you improve your English skills during the exchange?

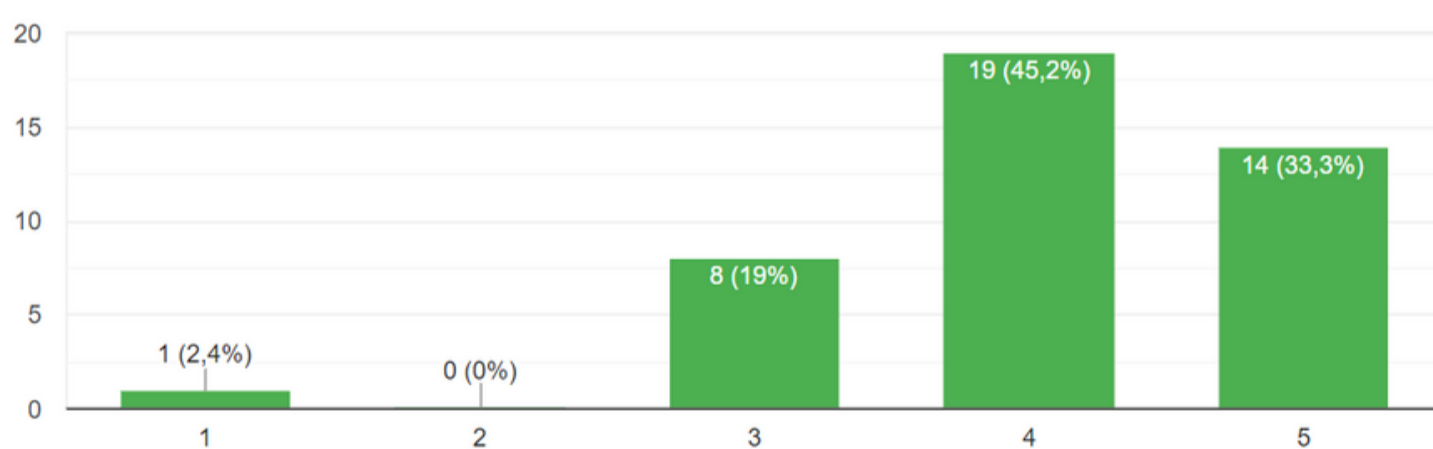

42 odpowiedzi

5

How do you appreciate the relevance of the activities in relation to your expectations?

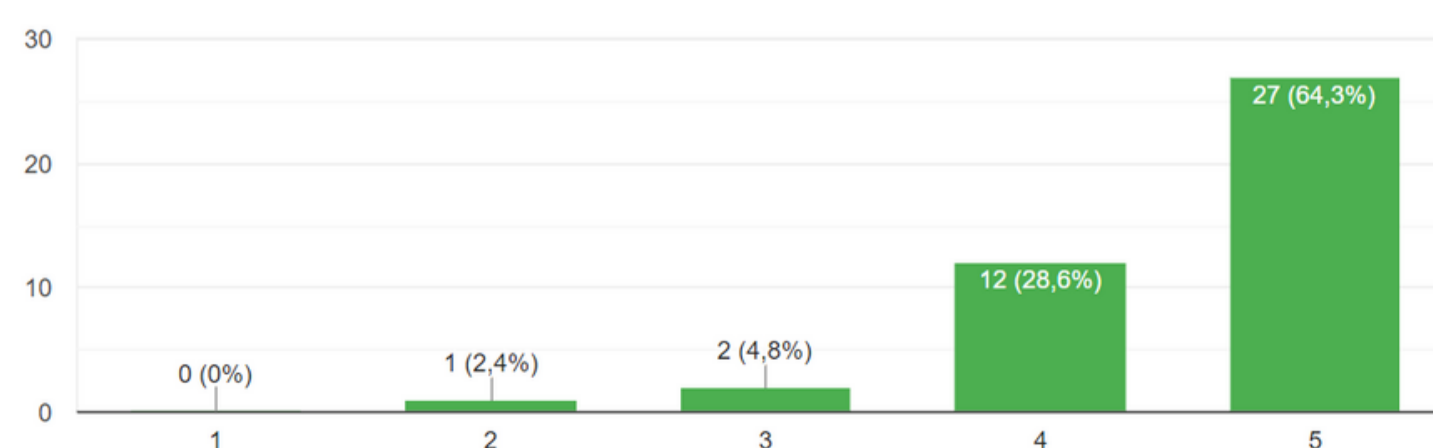

42 odpowiedzi

6

How do you appreciate the activity of the host school representatives from the point of view of communication and presentation skills?

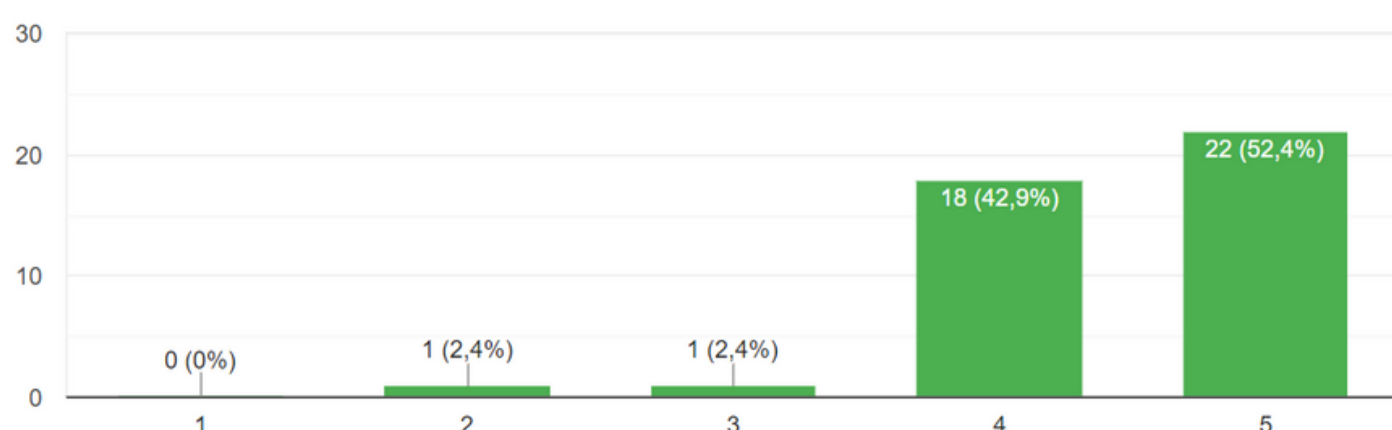

42 odpowiedzi

7

How do you appreciate the activity of the host school representatives from the point of view of interpersonal skills?

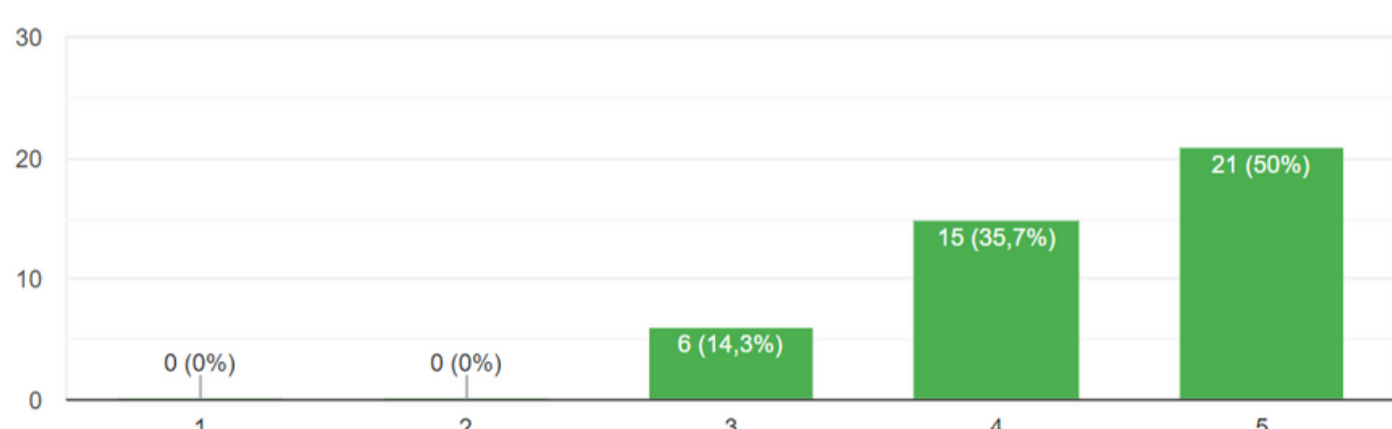

42 odpowiedzi

8

How do you appreciate the quality of the materials you were provided with?

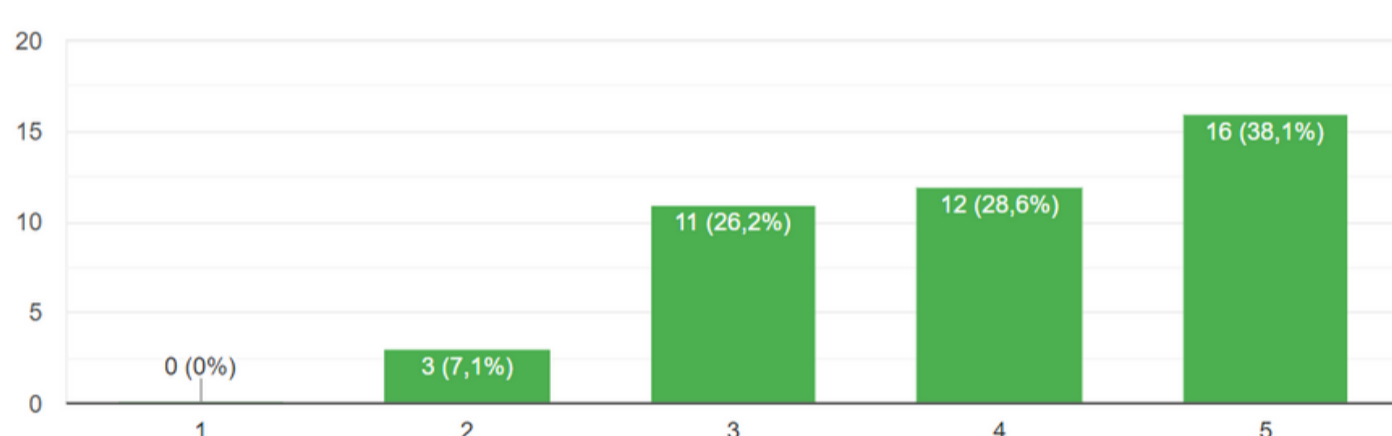

42 odpowiedzi

9

How did you like the lecture about the Blue Deal Project conducted on Monday?

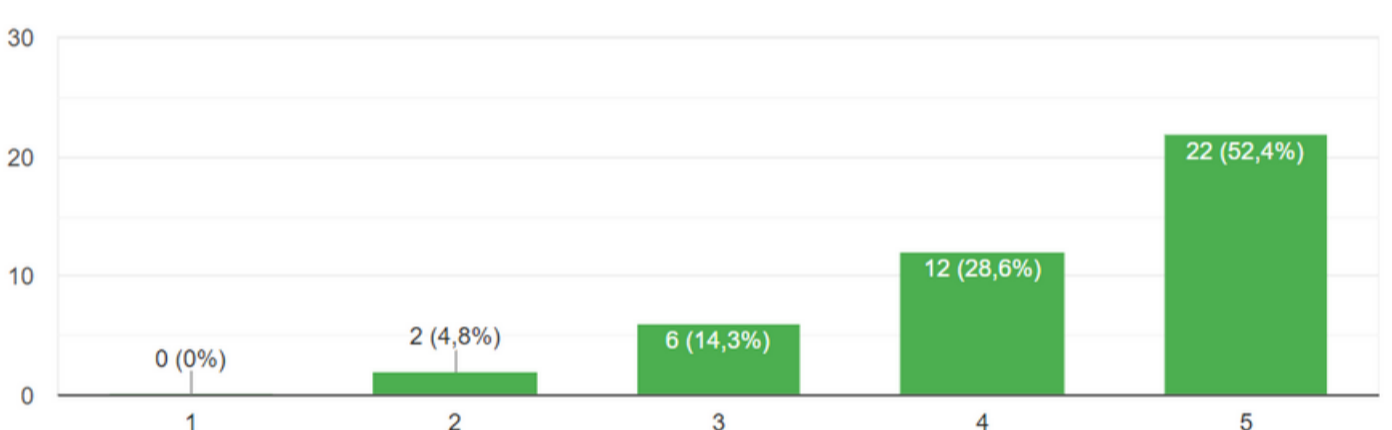

42 odpowiedzi

10

How did you like the workshop about renewable energy sources and the visit to a school lab (hydraulic energy and marine energy) conducted by Mr Leonardo Consortini?

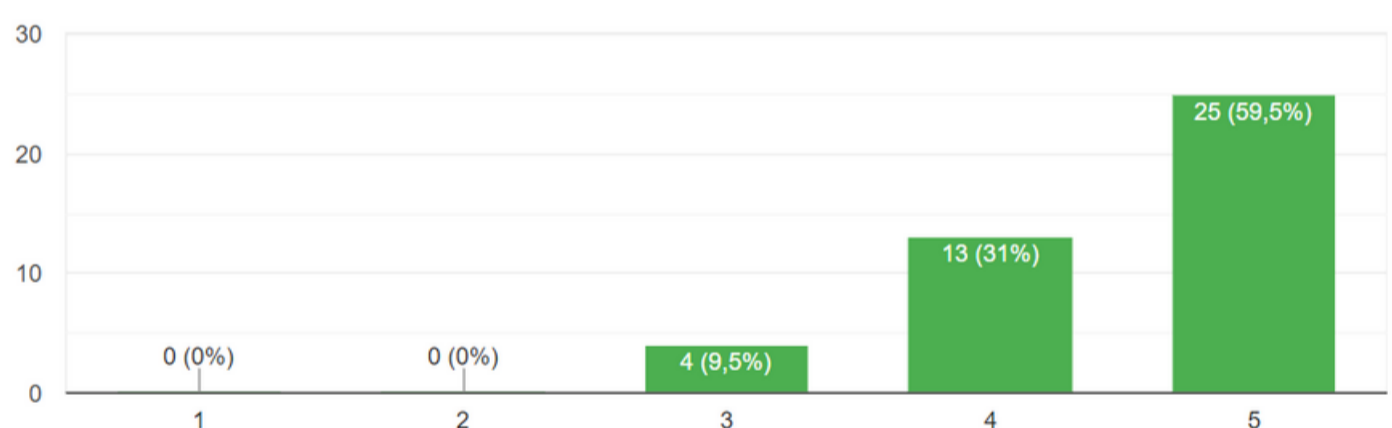

42 odpowiedzi

11

How do you appreciate the quality of the City Tour of Siena?

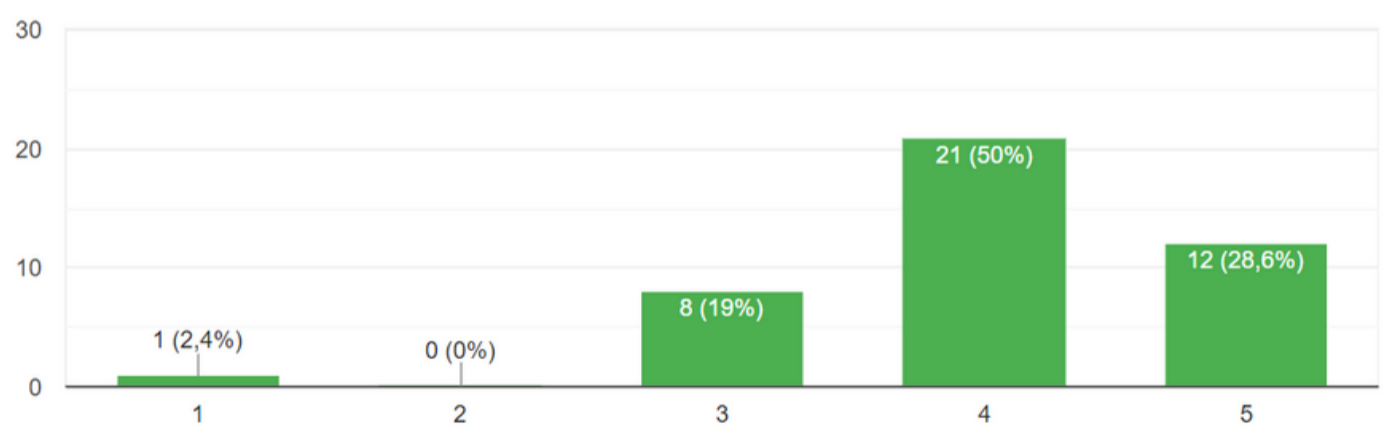

42 odpowiedzi

12

How do you appreciate the quality of the presentations of renewable energy sources in each country?

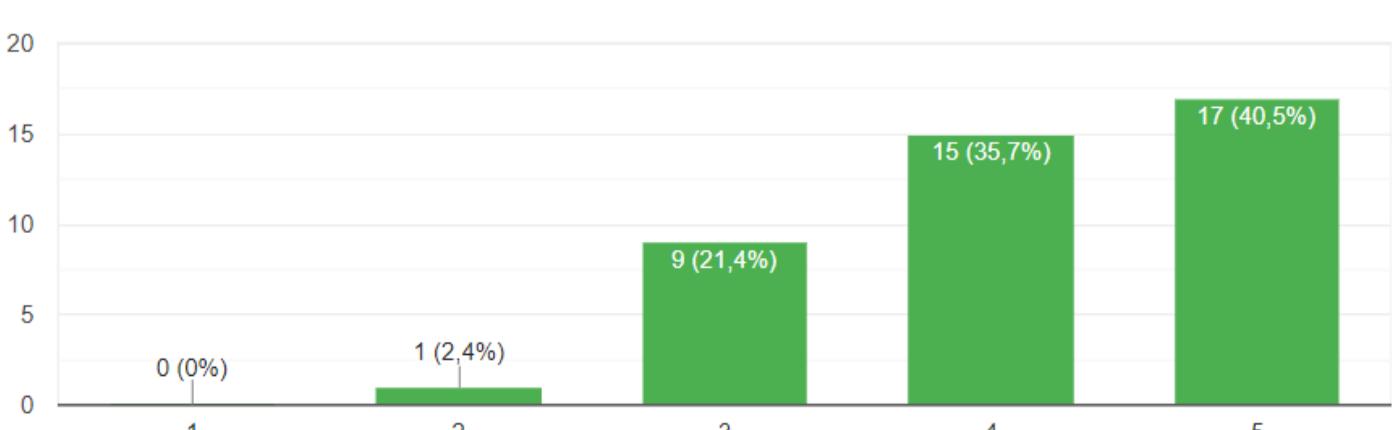

42 odpowiedzi

13

How do you appreciate the quality of the group discussions about renewable energy sources conducted by Mr Eliot Avery Kaough?

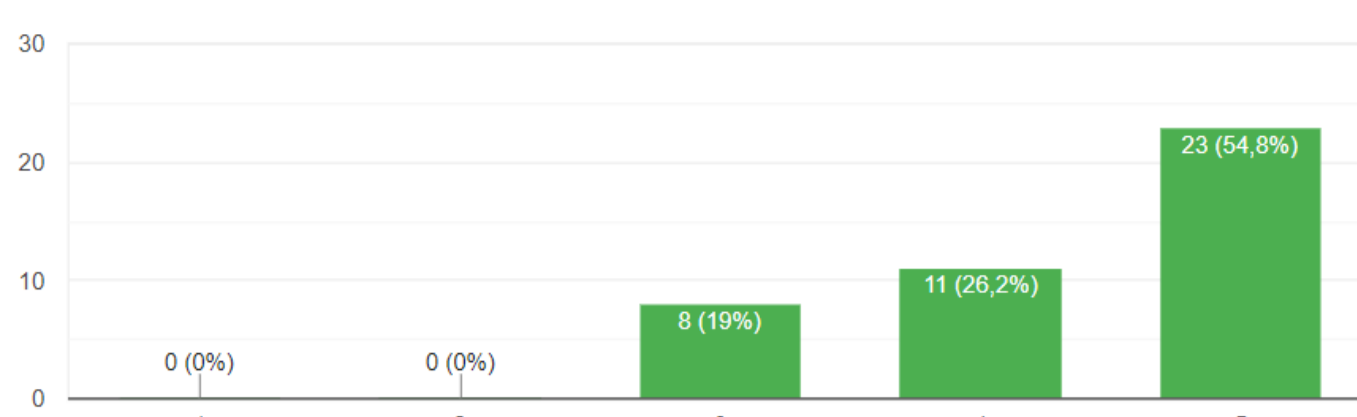

42 odpowiedzi

14

How do you appreciate the quality of the visit to the Town Hall and the historic Palio horse race room?

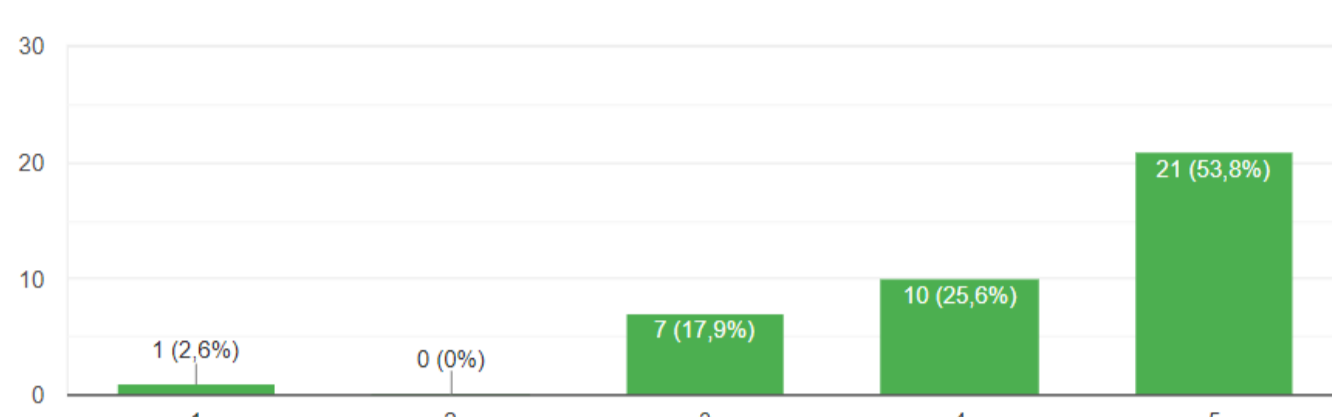

42 odpowiedzi

15

How do you appreciate the quality of trekking at the geothermal park in Larderello?

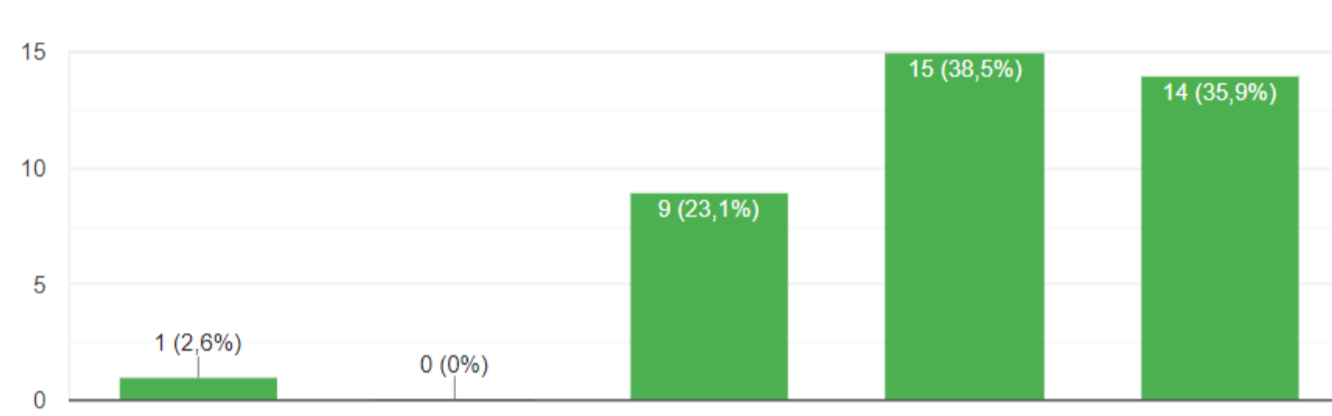

39 odpowiedzi

16

How do you appreciate the quality of a guided tour at the geothermal power plant in Larderello?

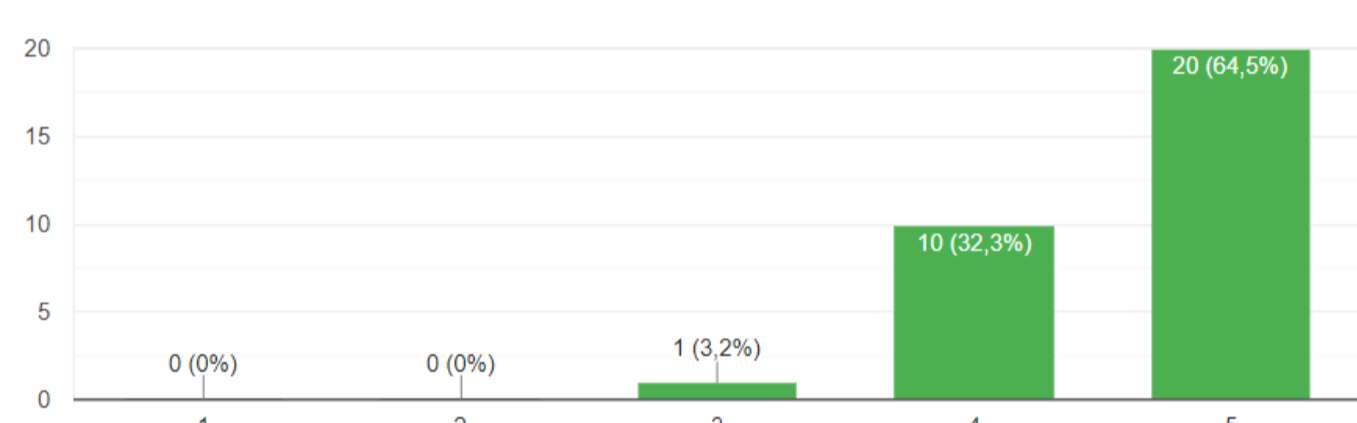

39 odpowiedzi

17

How did you like the sightseeing activity of Scavenger Hunt in Florence? (only students answer!)

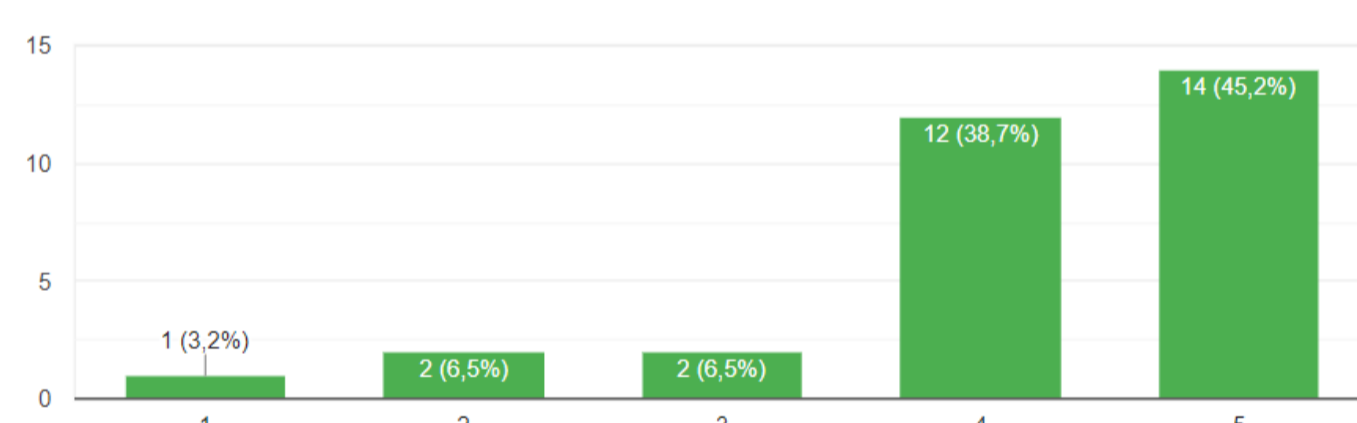

31 odpowiedzi

18

How did you like the group work - production of a vademecum on good practices to save energy for peers? (only students answer!)

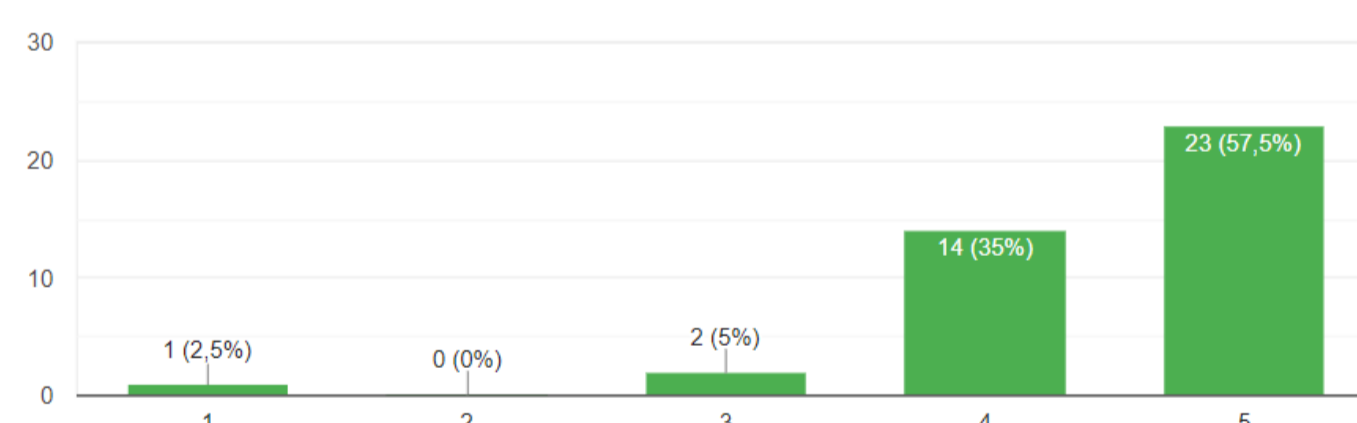

31 odpowiedzi

19

How did you like the final group presentations about renewable energies on Friday?

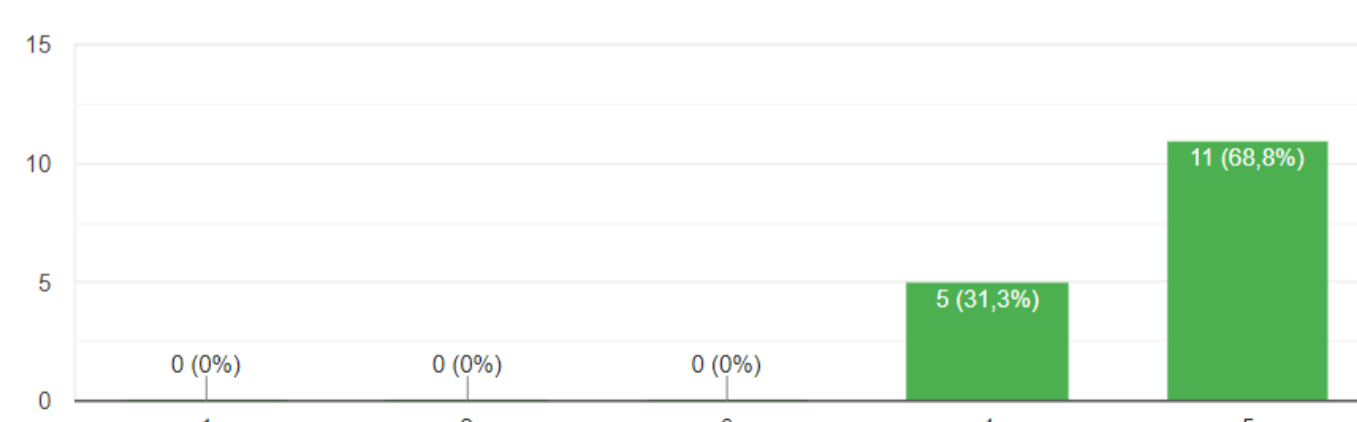

40 odpowiedzi

20

How did you like the school tour for teachers on Friday? (only teachers answer!)

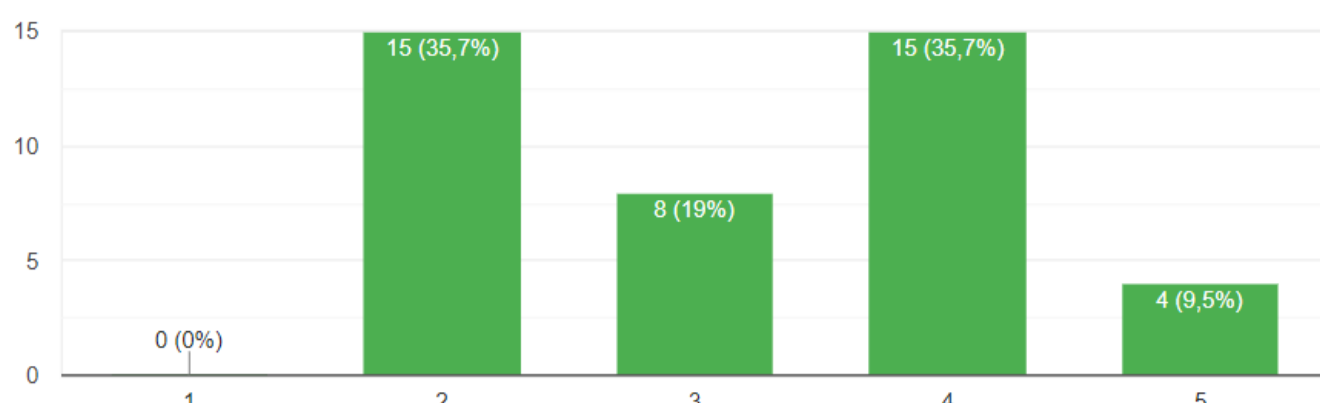

16 odpowiedzi

21

How do you appreciate the quality of food during activities (packed lunch)?

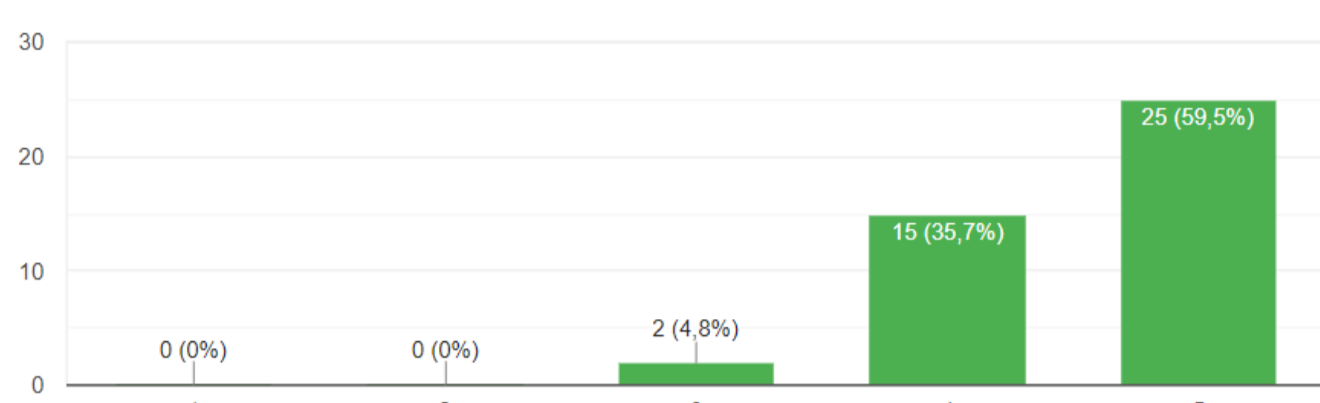

42 odpowiedzi

22

How did you like the evening meals all the participants had together in the restaurants?

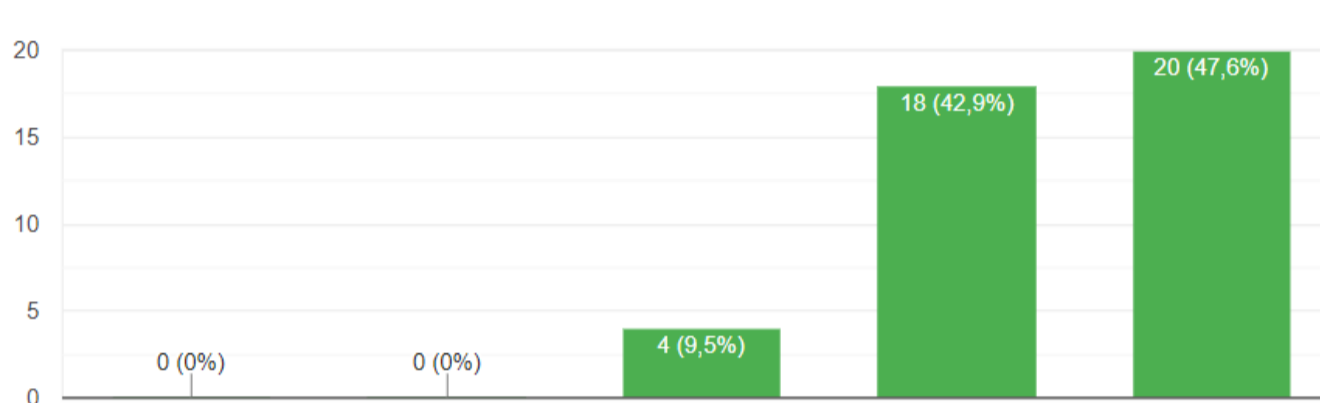

42 odpowiedzi

23

How do you appreciate the quality of accommodation in Siena?

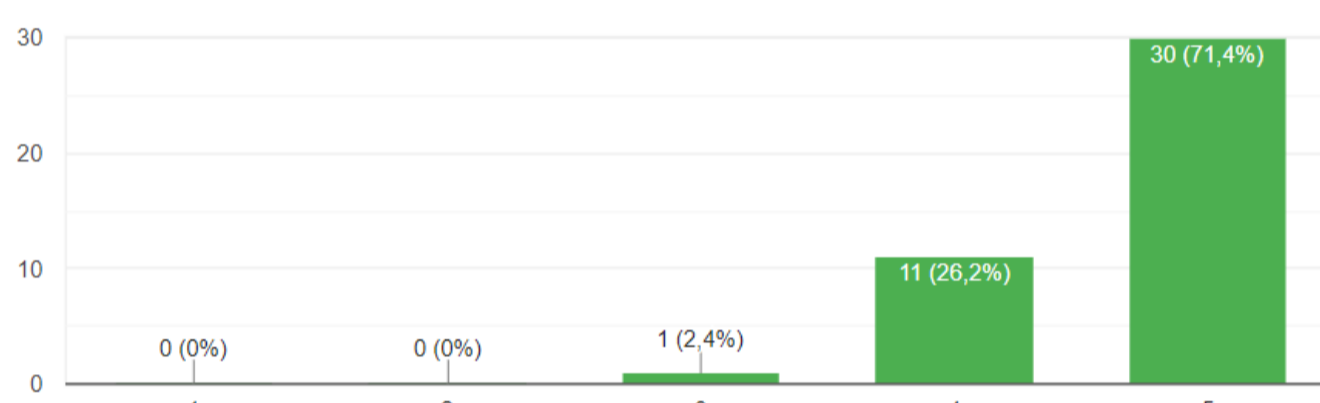

42 odpowiedzi

24

How do you appreciate the quality of time spent with the hosts and other students?

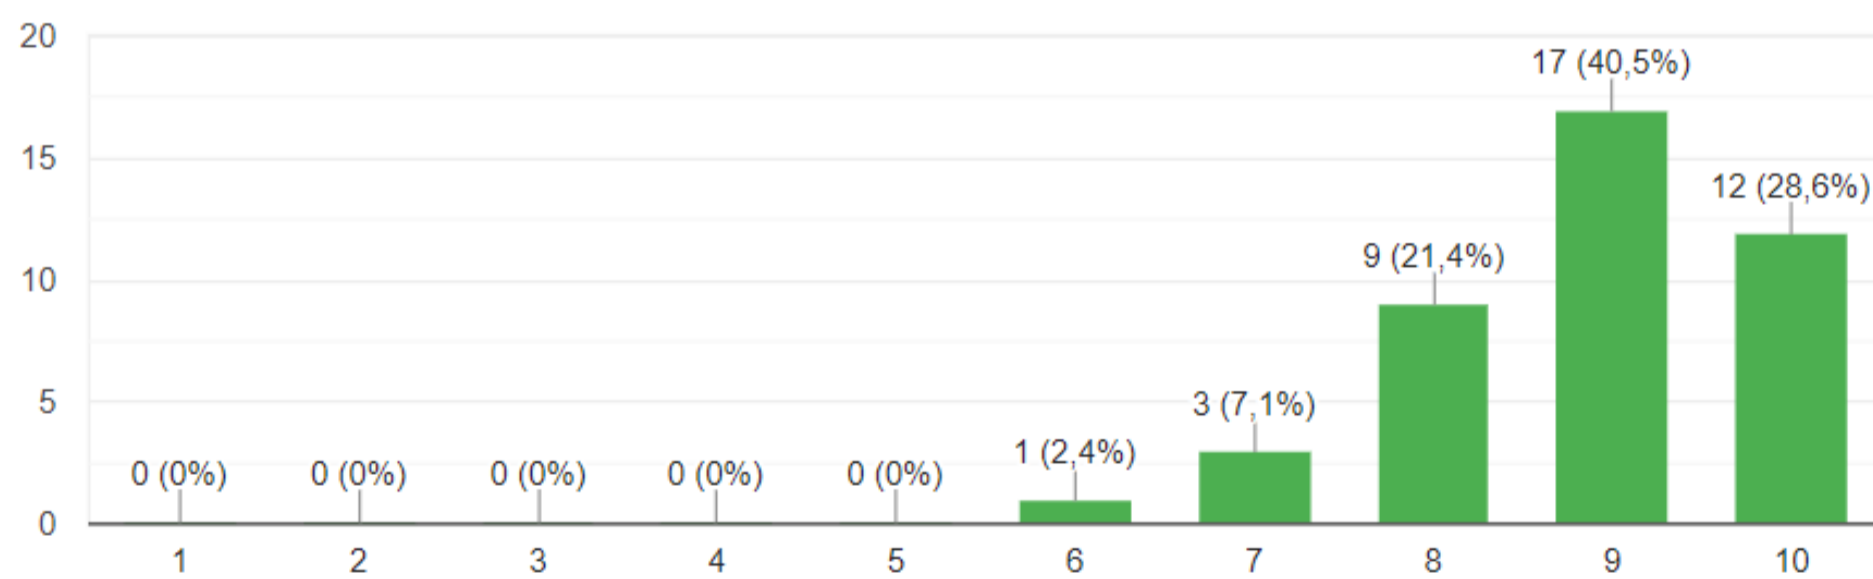

42 odpowiedzi

## Overall score

On a scale from 1 to 10, how do you appreciate the overall organisation of this exchange?

42 odpowiedzi

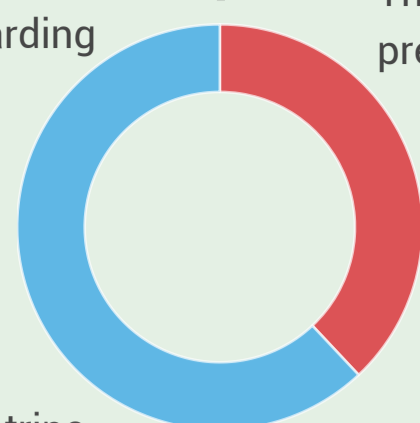

**strengths of the meeting**

61% \*

**areas that require improvement**

39% \*

I think the strengths are that we learned something new and helpful not just about The renewable energies, but regarding our colleagues lifestyle back home and in Italy and noticing all the differences between us and the similarities we have in common.

The use of microphones during the presentations and more efficient pc

Breakfast at the hotel wasn't really well organised, there weren't enough seats and cluttlery for everyone

I didn't really like the packed lunch

Beautiful and interesting city, smart guides and nice Italian group, fun activities

Well organized, lots of free time, interesting activities, amazing people, wonderful trips.

People,atmosphere,food and the trips

well organized

People,atmosphere, food and the trips.

The guided tours and activities

free time in the evenings, the trip to florence when the groups consisted of people from different countries

the organisation of the activities, the beauty of the city, the friendliness of hosts and their readiness to solve all issues that appeared

Very good, I love when the meetings begin with the topics

The friendship among students the international mix

Great hosts, who could speak English very well, were really nice and friendly and had so many interesting things to say Great food Free evenings to spend time in the area

The people.

Cohesion and teamwork activities

Topic, city and visits

beautiful places, relaxed atmosphere, friendliness of the hosts well-organised trips (guided tour in Lardarello and Scavenger Hunt in Florence)

The communication, the presentations

Organisation and places to visit.

1. Well-organized; 2. Interesting activities; 3. Combining the theory with practice; 4. Working in mixed groups; 5. Students projects.

the game in Florence, the tour in Siena and the host students

The activities and the places we visited, but most of all, the people we met there

Communication

English

Interpersonal relations.

The number of activities that kept us all busy.

School Activities, packed lunch and better time distribution

The package food.

The city tour

I think that the packed lunch should improve a little

maybe focusing more on students interacting with each other during the workshops

Lunch pack could have been more varied.

place of the meetng

It was hard to get to know everyone. I think it would be better if we had more activities in smaller groups and enough time to rest a little bit. Also teachers forgot to tell us who won the outdoor game

better organisation of programme and of time.

There should be: - more varied food - breakfast and lunch - more interactive lectures / presentations - a bit less walking - for some people it seemed to be a problem - more supervising/monitoring of students' group work - shorter breaks between activities - more clear instructions on what to do and describing the plans (sometimes we didn't know what the next activity would be)

Flexibility

The pack sandwiches

School Activities, packed lunch and better time distribution

the school was too big and well equipped

The quality of the materials and the organization of the school

1. How much equipment the school possesses  
2. How big the school is

the school was so big and had a lot sport fields

The installations of the school. Their schedule

The time table and the invents like the car or the other machines.

What I found interesting about the school was how greatly equipped it was, therefore creating a perfect environment for students to participate in the theoretical and of course the practical side of each subject

\* well-equipped laboratories that provide students with gaining hands-on experience  
\* lessons finish very early at 13:30

the number of labs and all the equipment.

The school is really big and has some interesting constructions in it

School is big, students are kind

I loved the fact that there were many many labs and that the students had the opportunity to try out their theoretical skills in practice.

The fact that it is well-equipped and the students have the chance to see the practical aspect of things

I found interesting the fact that they have school on saturdays and the school was s-o big and it had two coffee shops/stores

Is really different the organization of the Italy schools compared to the education system of the other countries

**Mention two aspects that you found interesting about the school / the education system / the school life.**

The existance of different labs where students could apply the theory; the involvement of parents in school life.

I found the school facilities interesting as well as the schedule.

Team Work and problem solving

The labs and the sports courts

I found interesting Spain's education system and year organization and, even though I have been in this school for almost four years I liked the laboratories, which, having chosen the lyceum address, I had seen very few times.

I really enjoyed sharing this experience with people from different cultures and learning new things about different countries

The number of students at the school School equipment

the organization and the spaces that they have

The laboratories, the teachers

Labs and classrooms

Much much better than our school. More room for each student, better equipped the classrooms and the laboratories. Better communication between the school and the companies outside the school.

The timetable of the high school and the subjects

The laboratories and the school equipment

The education system

the lab we visited with Mr Leonardo was interesting, as well as the things the students built in there, I also liked when we could try to ride a go-cart if we wanted to

the lab equipment (which was AMAZING), the school building itself (how big it was etc)

that a technical school has such a large number of students; that the parents are allowed to contribute to the purchase of school equipment

Saturday is a working day, teachers and students seem to have a good time working on their fields.

1. equipment in machinery and labs  
2. variety of activities

Anything, it's my usual school

All of the various labs, machines and technology at the school's disposal

The size of school and the huge amount of workshops

I liked it very much

Labs and organisation

the teachers and the students were so friendly , I was surprised with the number of the students of the school.

Huge school, Completeness of equipment

\* the percentage was taken from the sum of all coments

Palio has been a really long-lasting race, it's over 800 years old, and I also found all about the contrades.

Living traditions of 17 Contradas and Palio in Siena; the game of Barberi, small wooden balls with Contrade colours

Cites Siena Subject laboratories at school

1. I learned a lot of things about Siena's history 2. I found out the way which the building were built

Palio and Picci

1. About Palio taking place in Siena 2. The history of Siena

The beauty of the town and the historical traditions like the Palio

The horse race and the food times.

Palio and architecture.

I found out about The contradas of Siena and the ball game that's supposed to show you who is going to win the next horse racing.

Siena is divided into 17 contradas that compete twice a year for the Palio, which is both the name of the festival/competition and the name of the prize.

there are 17 contradas and here is one of the oldest universities in the world

the city was amazing and the people who live there were so kind and friendly

The contradas, the horse racing

The power of church and politics

About contradas and palia.

### Mention two things you found out about Italy / Siena

frescoes and statues.

history, beauty of the city and pizza

Hospitality and the Palio track in San Prospero

The origin of the city's name and many other historical things that involve the monuments of the city

I learned that Siena has really good quality of tap water and that Tuscany was formed by volcanic activity

The Palio's races and the amazing architecture

Obviously I found out about the palio and how the horses are chosen for each contrada by luck. Also, I learned the fact that the oldest bank in the world is Banca Monte dei Paschi di Siena.

1. That in palio there are different teams  
2. That the centre of Siena is preserved practically the same as when it was done

Horse racing in Siena and that they add taxes in restaurants after people stop eating

I've never heard about Palio before, so that was definitely a nice thing to learn, as well as to see the Piazza del Campo where the race takes place

The Palio and all the tradition that we have here

Contradas and the town hall frescos.

The Palio from Siena and the religious bond that the city of Siena has it with Virgin Mary.

The city of Siena is a city surrounded by ancient walls, built on 3 hills, and has survived from the Middle Ages to the present day by preserving its historical texture.

The Siena-Florence war and the great architecture that Italy has

I learned how important larderello is to your renewable energy production and I learned about how there used to be a candle suspended in front of Simone Martini's Maestà.

The centre of Siena is amazing, I love this town

The usual Siena, in the bad and in the good things

Siena, a beloved place Palio

I have not found out anything new about Siena

palio, Italian way of behaving

Palio race and Florence's cathedral

Some parts of Siena stayed almost untouched since the middle ages. I also found out about existence of Palio

## Mention a difficulty you encountered during your stay and how you solved it.

### problem

We lost some videos for a project

At first, it was difficult to get to know the other students as there had been no ice-breaker games prepared

I told my teachers about it

I had been shy the first days

Our room flooded one night and we had to ask for a mop in reception, but they didn't have a mop

We had a double bed in our room

We couldn't come by bus

Firstly, it was difficult for me communicate with the other people because I didn't have the enough confidence to do it

Short time to prepare presentations

At first, it was difficult for me to speak with the other students because I am really shy

My difficulty was probably trying to become more of an extrovert

My feet hurt a lot at first

I was so exhausted because it wasn't possible to sleep optimally and I'm sensitive to noise. I struggled with headaches because of it and I didn't have enough time to gain energy again

Initially I had a hard time making friends with others because I'm shy

How to measure my time

I didn't encounter any difficulties

I haven't encountered any

I haven't encountered any difficulties

None

Nothing

I had no difficulty

Luckily, I have been perfect in all senses, i hadn't have any problem

I did not encounter any difficulties, everything was very good

No difficulties encountered

### solution

We thought of a new idea.

We had to awkwardly introduce ourselves.

They were very nice and came with a sollution.

After we communicated with the other student, I felt comfortable

They gave us a broom and we had to clean all just with a broom and 2 towels.

We asked about it at the reception and it turned out that those are actually 2 beds joined, and we can just move them apart

We came by train

Finally I enjoy a lot speaking with them

Solved it by making our presentation less complicated and working literally as a team

With time, I started talking to them, and they were all so nice

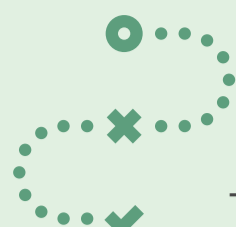

Realizing that this was only going to last for a week I figured that it's important to enjoy every second of it with the people next to you

I just got used to it

I tried to stick with 1-3 people at one time and rest the longest I could

I got used to it and got to know everyone

After 2 days I got used to it.

## Name two people from the host country (students, hosts, teachers, other) that you found very helpful.

Elisa, Leonardo

Elisa and Patrizia  
**2 ANSWERS**

Eli and Elisa were soo helpful

Niccolò and Julio

Niccolo, Francesco, Mr Eli

Niccolo, Samuele

Agata from the students and Elisa from the teachers.

The teachers, Leonardo

Guide from Larderello and all of Italian group

Patrizia, Elisa, Leonardo, Eli, Nicolo

Eli was incredibly helpful and managed to keep us engaged during the group projects. Also, I think Niccolo was a very good choice for a guiding the tour on the first day.

Niccolo and Francesco  
**2 ANSWERS**

Niccolo, Leonardo

I think there is someone in particular that I think helped everyone is Mr. Eliot and also Mr. Leonardo

Mr Consortini and the Italian guys

Agnieszka

Niccolo Bandini, mr Eli Kaough

Type Niccolo and Giulio, were amazing guides.

They were very nice and kind. They have helped me a lot.

Niccolo and Giulio mainly, as well as the other italian guys: Samuele, Niccolo, Gaia, Giulia and Francesco.

All the italian boys, Giulio, Franchesco, Niccolò B, Niccolò Ossi and Samuelle.

Elisa, Patrizia, Niccolo

Patrizia, Elisa, Leo, Eli, Nicolo

Leonardo and Nikolo

Agata Kurek, Flora Porgiotti and Dafni

Teachers and students pariticipating were awesome.

All Leonardo and Giulio

Eli, Giulio and Nicolò

Leonardo Consortini and Eli

Giuliuo and Niccolo

**2 ANSWERS**

Niccolo and Julio

## Do you intend to keep in touch with any of the participants? How?

yes :) By WhatsApp

Sure, social networks at least.

Yes

Yes of course by social networks

No

Yes, thanks to social media

Yes, we have an Instagram group, and we are all in contact. I'm still talking each day with all of them.

Yesss , we are thinking on making a trip to Barcelona to see our spanish Erasmus colleagues.

Yes! Through Instagram mostly as we have a group chat as well as just private direct messages

Yes, I actually am planning that :) perhaps via messages and photos.

Yes, by the social media like instagram

Yes, we are all in a instagram group

We all kept in touch with each other in some way because we have a group on instagram where we talk almost everyday

I do intend to keep in touch with them, maybe via text messages and video-chats

Yeah I want to keep in touch with my new friends from social media

Seen them next time.

Of course! By

Use the what 's up

WhatsApp

Via instagram

I don't think I've formed a strong enough relationship with anyone to keep in touch with them

For sure through social media Via social networks

I loved everyone who was there, I'm thinking of talking to my friends.

Elisa and via internet

Yes and via whats up

Planning the future activities together

Yes, thanks to social like Instagram or WhatsApp

Instagram

Yes, in Instagram

Yes, by social media, we already have a groupchat

Yes, we're friends on instagram

Yes from social media

Yes, I speak with some participants by instagram I want keep in touch with them 😊

Yes, I want to stay in touch with the participants thanks to social media

We followed each other in instagram

Of course, hopefully to the end of my life :) Via social media.

Yes, by using snapchat and instagram (and maybe whatsapp)

Yes, through Instagram messages

**Mention at least two aspects that you remember from the presentations and activities on topic of renewable energies.**

The blue deal, the types of renewable energy

The Philippines is the country exploiting geothermal power the most; People are reluctant to use geothermal power to a greater extent in Italy (and elsewhere) due to the seismic risks, which is scientifically proven to be incorrect.

The efforts every country is doing during this transaction and the involvement of the students

One aspect that i remember is about water pollution and how this influences our lives. And another one is how easy it is to save water and reuse it.

A small procentage of renewable energy in my country

they require natural resources and they are more friendly for the Earth

Around 2 billion people on Earth do not have access to clean, safe water -70% of the water in Europe is derived from natural lakes, streams etc

The benefits of them and where they can be found

I learned that there are 5 types of renewable energies: solar, wind, biomass, hydro and geothermal energy. Also I gained an understanding of how the hydroelectric energy works from the team project that we had on friday.

I remember the presentation about hydroelectric power in lab and the guided tour in geothermal area

The highest percentage of geothermal energy used in Italy and all the sources used in Greece.

Geothermal energy and the power of the sea (tides, weaves, currents etc)

I learned more about the geothermal energy and new ways to harness the movements of waves by the blue deal team

I found out how off shore wind turbines are set up and how energy is made from biomass

Energy from Water sources and the geothermal energy

Solar energy usage and biomass cost

geothermal sources and the importance of saving

Geothermal and submarine stuff

Renewable energies are cheaper, are better etc

Geothermal energy and history of Larderello

renewable energies are so important to the climate change

Song and video

presentations took very long time but the activities were so nice and we had a great time

types of turbines used to produce renewable energy, the importance of our actions

Geothermal energy and the power of sun

We have to use more renewable energies All the countries should invest in them

I remember that before choosing the spot for on shore wind turbines there should be thorough research conducted in order to ascertain the possible harmful effects on biodiversity (and to choose the least harmful variant); also the fact that though in Tuscany geothermal energy makes out a great part of renewable energy, overall in Italy the percentage is actually small.

1. in Greece the most used energy is hydroelectric
2. Lardarello has a secondary geothermal point, that is why they can produce energy

I remember the part where we had to search for benefits and drawbacks of each renewable energy source as well as the expense that followed the implementation of each

Lab visit and the Larderello trekking

I learned a lot about renewable energy sources and I learned about their usage rates in other countries.

Italy has a lot of geothermal power and using it is quite cheap compared to other energies, China produces the most wind energy in the world

Where geothermal energy is found and what are the costs

I learned what types of renewable resources are and which ones are most exploited in different countries, but I also understood better how they work

Biomass and solar energy

People's increasing awareness of the urgent need for a change and the incredible source offered by marine currents

**Exemplify two events/aspects/things/highlights you experienced during your stay that have had a major impact on you.**

I loved when we were all togheter dancing or singing or both or actually just talking to each other. I left Italy saying „see you” to my friends, I can say now, instead of saying „bye” and that's another thing I love because I know that we'll see each other someday

I have learned how to be a better teammate. Another event that has had a real impact on me was at the treasure hunt.Even if my team lost,at the end of the day the most important thing was the time spent togheter.

The nights after the dinner when we spend time all together are for sure one of the things that I will never forget and the video that we had to make as a project was also a fun experience.

the time during our first day at school when we started dancing together and learning each other things in our languages, also a basketball game on Friday, I enjoyed it a lot

It was amazing to understand each other with guys from 5 different countries 2. I learnt how important is to travel and to learn things about different cultures

The poem that Leonardo brought to the final dinner, bearing the signatures of the hosts. The distance from the hotel to the school; the variety of Italian cuisine

All the dinners have been amazing to meet each other and create a better connexion. I also loved all the projects where we had to relacionate with each other.

The first dinner on our own, the students, was really special because we bonded a lot, and also the bus rides to Larderello and Florence.

The trip to Larderello by bus was very funny because we all listened to songs togheter and the dinners that we had with the whole group.

The visit to Florence with the scavenger hunt and all the dinners that we had because we got to know each other better

breathtaking views of Tuscany, also while trekking in Lardarello; conversations during walks in Siena or in Florence

meeting people from different countries (especially introducing each other on the first day), group final project

I was very impressed by the visit to Florence and it was very nice to be able to have dinner all together

with this project, i have improved my english a lot and also i will be more cautious about environment

My favorite moment of the erasmus were when we made a song about wind energy, it was so nice

Free time and dinners

with this project, i have improved my english a lot and also i will be more cautious about environment

meeting people from different countries (especially introducing each other on the first day), group final project

All the dinners have been amazing to meet each other and create a better connexion. I also loved all the projects where we had to relacionate with each other.

The visit to Florence and the group project from the last day.

The students-only dinner which connected everyone more with each other and created the possibility for us to bond even further. The incredible paintings found in the buildings that we were shown.

The knowledge of the Italian teacher and the visit to the power plant

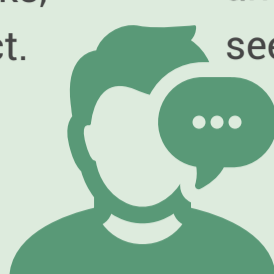

Siena It impressed me a lot. I would love to go there again.

the time during our first day at school when we started dancing together and learning each other things in our languages, also a basketball game on Friday, I enjoyed it a lot

Some drug addict shouting at our group during the outdoor game in Florence

I was very impressed by the visit to Florence and it was very nice to be able to have dinner all together

breathtaking views of Tuscany, also while trekking in Lardarello; conversations during walks in Siena or in FlorenceType something

in some countries half of the nation's energy is produced with renewable sources; in all the partner countries solar power is probably the most common one

I remember that I was surprised to find out how big larderello's energy production is for Tuscany and I was also surprised to learn how biomass energy production is bigger than I expected in some of the countries participating in the project.

The visit to Florence with the scavenger hunt and all the dinners that we had because we got to know each other better

Too many activities in a day, there is little or not time to rest.

The trip to Larderello by bus was very funny because we all listened to songs together and the dinners that we had with the whole group.

The difference between all types of energy and the explanation of the solar panels

There are many different kinds of renewable energy, not only solar, wind, water etc and it has so much potential

Almost all countries use solar energy and hydroelectric energy as Renewable energies.

The types of renewable energies and the benefits of using it
