

# Evaluation results- Barcelona

1

How much did you improve your knowledge about the ways how can schools be "green"?

2

How much did you improve your knowledge about the environmental campaigns conducted in each partner country?

3

How much did you improve your knowledge about the history and traditions of Barcelona?

4

How much did you improve your English skills during the exchange?

5

How do you appreciate the relevance of the activities in relation to your expectations?

6

How do you appreciate the activity of the host school representatives from the point of view of communication and presentation skills?

7

How do you appreciate the activity of the host school representatives from the point of view of interpersonal skills?

8

How do you appreciate the quality of the materials you were provided with?

9

How did you like the ice-breaking activity (Speed Dating) on Monday? (only students answer!)

10

How do you appreciate the quality of the presentations of "green schools" in each country, and the discussion that followed?

11

How do you appreciate the quality of the visit to La Sagrada Familia?

12

How do you appreciate the quality of the International Evening?

13

How did you like the sightseeing activity on Tuesday (Museum of National Art of Catalonia and Castell de Montjuic)?

14

How did you like the visit to the City Hall and guided tours of Barcino and Medieval Barcelona on Tuesday?

15

How did you like the visit to Sant Pau Hospital on Wednesday?

16

How did you like the international group work on creating videos about reducing waste? (only students answer!)

17

How do you appreciate the quality of the guided tours at Parc Guell, Els Bunkers MUHBA and the area of Passeig de Gracia on Thursday?

18

How did you like the videos about reducing waste created in international groups?

19

How did you like the activity of planting an "iGO ECO tree"?

20

How do you appreciate the quality of the Farewell Party at school on Friday?

21

How do you appreciate the quality of food during activities provided by the school (e.x. Paella, packed lunch)?

22

How did you like the meals all the participants had together in the restaurants?

23

How do you appreciate the quality of accommodation in Barcelona?

24

How do you appreciate the quality of time spent with the hosts and other students?

# Overall score

On a scale from 1 to 10, how do you appreciate the overall organisation of this exchange?

# Mention two aspects that you found interesting about the school / the education system / the school life

It had a lot of facilities and it was big

The school life

The warm atmosphere and the facilities

friendly atmosphere in school

the school was very beautiful and big. the students of the school were very friendly

the class, the garden

The classrooms were well furnished, the students were very active, outgoing and friendly

1. Students call their teachers by their names
2. Grading system and exams are totally different than in Poland

The aspect of the school and the friendly people

1. The school yard
2. The classrooms

La Sagrada Familia  
Hospital Sant Pau

friendly students-teachers relationships; relaxed atmosphere at school

Spanish students graduate from secondary schools earlier than in my country; they have very good relationship with their teachers

People spending breaks (mostly) actively on the outside of the school main building.

Different ways of learning stuff and subjects (technology room and library was kinda cool)

everything in school was great i like that it has a large field and the place where we make presentations

there's nothing I find interesting

timetable, sports

How the school classes are organized, the relationships between teachers and students.

I was impressed of the bond students and teachers have, they are really close and I feel like the learning process goes better this way. Also, the time everyone spends outside playing sports amazes me.

I liked that you had a great school and your library.

technical classes, a lot of time spend outside on the school grounds

Students call their teachers by their names and there is an casual relationship between them.

Spanish students can spend breaks on the fresh air.

1. In Spanish school there is more emphasis on hands-on activities
2. Students refer to teachers by first name

the IT classroom, student-teacher relationship

The life of students in school

their way of treatin to their student were too different from us but i saw that this way makes students releived so they can describe themselves/issues/problems easierly

Two things that I liked about the school was that it had leaflets about feminism and fountains to fill your bottles.

The communication between the teachers and the students.

There was a close relationship between students and teachers; the spanish project team wich is very conected; the climath in school is very friendly.

You can choice the subject to study, there is no school on saturday

The convenient laboratories/ the beautiful grass surface in the yard.

spanish school have a large break into the middle of the day and the door locks during the school hours

- anyone can wear whatever that want  
- the school is always open for afternoon activities

the school has so much electronic devices like laptop etc. and school's garden was so green and big

The students were very engaged with each other and had time to play sports and hangout around the school grounds, which was nice to see. The bilingual aspect of the school was also very impressive

I would like to have a tablet as an auxiliary resource in our school.

I liked the architecture of the school and the teachers were very friendly

# Mention at least two aspects that you remember from the presentations and activities on the topic of green schools

they are just prepared with big attention

We did projects related to recycling and planting trees.

The presentation of the Polonian group

Mixed group and fun

1. People in Barcelona face the problem of creating too much waste

2. The city council is doing everything it can to solve environmental problems

using glass bottles  
switch off taps while not using

the car-free day event of the polish people, planting the ico-ego tree in greece

The videos that create the elegetions and the corporation among them.

cleaning beaches,  
planting trees

Two aspects that I remember from the presentations and activities on the topic of renewable energies are the videos that we made with the international groups and the presentations of each delegation.

Wind tribunes  
and sun

Plastic recycling is very important. In addition, we need to be very careful about the use of water.

It works as well as non-renewable sources of energy. Our Little steps contribute to a significant change.

There is a need for more public transportation since there is a lot of traffic which causes emissions of CO2. There is a lot of trash being generated by the citizens so reusable materials should be encouraged

student's presentations, the videos the groups make

everybody's presentation was great.

the videos and we talk only with the children

The inspiring videos made by the mixed groups and the presentation of Poland which tries to be green in multiple ways.

The green schools activity focused on how to reduce waste. The students spoke about saving water by installing taps that close in the bathrooms and using reusable bottles.

1. Turning off the tap while washing teeth could save 15l of water

2. There is a project connecting a few schools in Barcelona, and encouraging every school to becoming more and more green

checking the water quality, ecological contest

more and more schools care about sorting waste; they educate students to be responsible citizens

1. The videos we create with the groups we were with2.
2. The activities we did at the first day, when we met each other
3. When we watched the presentations about what others schools do to make them more environmentally friendly.

I like the idea to present videos, the involvement of the students

Drinking fountain,  
reduce the use of paper

beach  
cleaning

a pomegranate tree was planted in Sifnos and the school yard was revived;

a clothes swap was organised in Barcelona to focus on zero-waste lifestyle, clay pots were created

The special programs implemented by the local administration in order to create more green spaces;

Checking water quality in  
Greece

Bear attacks in Romania  
(very dramatic)

recycling and avoiding waste are important for a greener school

My favourite part was the making of the video, but I fondly remember the speech of the special guest.

Solar panels,  
green areas.

I remember we made the videos and planted the tree.

reducing waste,  
plant trees

I think recycling is very important but also we have to be careful with the pollution of the air

Recycling bins and  
water fountains

The use of drinking  
fountains and the  
gardening

# Mention two things you found out about Spain / Barcelona

catalunya

1. It has a huge subway 😊
2. The streets create rectangular shapes
3. Tiles on the pavement are characteristic for Barcelona

it was a well planned city worth to see cause of Gaudi

very clean, full of green

The fact that the Sagrada Familia has been built for 150 years. that floral patterns on the sidewalk have meaning in the past.

La sagrada familia

That Barcelona is a bilingual city and Gaudí is the most important architectur of Spain.

sagrada familia and sant pau hospital

There is an really high number of people who consider themselves as a Catalan, the urban life last 24/7.

who was Saint George and Sagrada Familia

Sau Paolo used to be a hospital for the poor. Saint George plays a big part in catalan culture

My favourite moment first day.there will always be a place for me.

1. There are trees and other plats patterns in Sagrada familia that are not visible at the first sight

2. The paella is originally from Valencia

Barcelona is an international city stuck in an autonomous region and the mix of culture, language, and people is very beautiful and impressive. However It is sad that Spanish is spoken in public more than Catalan and that many workers and immigrants don't learn Catalan.

Sant pau hospital and gaudi's buildings

In Barcelona I found out a lot of things about many historical buildings and Gaudí's life.

Barcelonians feel very strongly about being Catalans; they have great cuisine

That their pavements were really large and the architecture was very interesting.

The fact that it has Roman ruins  
The Crema Catalana dessert (yamie)

it has access to the see and mountain, superblocs

most of the people couldnt speak english

Lively people and city

It's really clean, with beautiful scenery and places to visit and people use the bicycle a lot

In Barcelona they speak Catalan, which is a bit different from Spanish and there are a lot of great old buildings.

Patatas bravas, paella, fideua and gazpacho were discovered by me ;)

The construction of Sagrada Familia started in 1882 and the church is still being built

La sagrada familia, park guell

Gaudí and the food

Barcelona hosted expo and olimpics games and lot of buildings has been built for that occasion

Saint Eulalia is the patron saint of Barcelona and Saint George is the patron saint of Catalunya

civil war, monarchy

Beautiful city and nice people

I actually found out a lot about lifestyle, architecture, history and traditions (Saint Jordi for example), and I discovered some local foods (Paella was really good), and local drinks too (Aquarius is amazing!)

it was once part of the Roman Empire, Olympic Games held in Barcelona in '92

It is the capital of Catalunya

They eat big dinners, there's a lot of trees in the city

I found out La Sagrada Familia has trees as a foundation. Also, I was really impressed of the history of the City Hall.

there are many buildings belonging to Gaudi and they also speak catalan in spain

I found out that Barcelona is an antique city and has a lot of stores from the past

**Exemplify two events/aspects/things/highlights you experienced during your stay that have had a major impact on you.**

**The explanations made by the students who guided us, the melting pot of all the students**

**The friendship that we established with the spanish guys and the cultural differenses among the different countries**

**the sightseeing**

**Hearing about reduce and recycle makes me wanna act better**

**The farewell party and the warming welcome we were given by the spanish students**

**International evening and visit to the Sagrada Familia**

**All the places were beautiful but for me the highlight was a walk in Parc Guell; the time after the activities spent with other teachers**

**Wishing goodbye to all the other students was way more emotional than i had thought and it changed the way i look at people. The international night was a lot of fun, trying new things from different cultures**

What affected me a lot was all the activities we did for the green schools and how they changed the way I thought about this topic for the better.

meeting with students, different cultures

1. The interior of Sagrada familia was breathtaking because of light changes during the day
2. Spanish people, atmosphere and attitude is so great. People are open, outgoing, fun and always helpful.

## Parties

farewell dinner, montjuic trip

I loved how nice and open people were, the dinners together and casual talks, the idea of students doing the tours

everything all amazement.

Visits to Sagrada Familia and museums

International dinner, trip to the Park Guell.

I discovered a culture that was completely new to me, while wandering the streets, eating the delicious dishes, talking to the people, I could say I fell in love with Barcelona.

being united of students in a short time collabaration and quick warming of pupils

The corporation among the colleges and the positive aspects

I get to know amazing people and friends for lifetime, I've seen a lot of beautiful places

The visit to Sagrada Familia.

The inspiring videos made by the mixed groups.

all the projects and communication we have with other students, the visits in the city

## **sagra da familia trip and farewell night**

**All the events fore me were amazing but the top 2 events were the international evening and the last night at the school.**

**I think it is beautiful how the different groups come together, share their cultures and interests, and work together in such a fun and easygoing way. These projects show how people from different backgrounds can not only get along but also work together to make the world a better place.**

## **The walking tours and the visit to Sagrada Familia**

**Two things that had a major impact on me was the acquaintance with everyone because it made me more extrovert and the things learned about reduse and green schools.**

## **International night, the visit to the hospital**

## **sagrada familia, montjuic**

**The art museum was spectacular and the international night was a very beautiful event that I will never forget**

## **Guell park and anti craft plane mountain**

**1. Eating out together and teaching each others our languages**

**2. Visiting picasso museum**

**3. Trying paella and other local foods**

**4. Visiting Parc de la ciutadella**

**Mention a difficulty you encountered during your stay and how you solved it.**

## **problem**

## **solution**

It was difficult to hang out in such a big group

We had to split and choose who we want to meet with

**foods**

we solved by going to a fast food restaurant

We couldn't find the hotel when we first arrived.

we asked someone

Lack of courage to talk to the people

I just overcame it.

on tuesday it was a little tiring day

when i come back to the hotel i just fall asleep

the farewell when we all started crying and hugging each other.

I didn't solve it yet, but it's hard to get over these beautiful memories

At first it was difficult talking to the other students

because we were given a topic to talk about we got more warm with each other and the conversation started flowing with no problem

I wasn't able to connect my phone to hotel WiFi because instructions were written in Catalan

I asked receptionist to help me

Sometimes it is difficult to work together as professors

hopefully with better communication future issues will be avoided.

I didn't like the taste of the water and the blankets were too thin

A difficulty that I encountered during my stay was when we filmed the videos because it was a little awkward

in the next days everything was fine

Some of the Spanish people couldn't understand english so we couldn't communicate with them.

Too much walking up and down the hills. My feet really hurt.

Too much walking up and down the hills. My feet really hurt.

**language barrier**

not thinking so much about the way I talk

**I meet a lot of peoples**

**Lost luggage**

**One difficulty was that we walked too many hours.**

**The luggage that didn't arrive**

**our luggage arrived later**

**Unfortunately our luggages hasn't arrived with our flight but only four days later with another flight.**

**Initially I had difficulty communicating with other students**

**Me and my friend had received a room with double bed, so we had to change it.**

**not enough sleep**

**we couldn't do anything special just wait**

**the hosts gave us some clothes**

**we bought and borrow some clothes**

**The spanish guys helped us a lot giving us some clothes to use meanwhile**

**then I did a lot of friedships.**

**After we change it, we had room with another double bed, but this one was separable, so after moving really weird and nasty lamp (that was attacking us in next nights), we separated this bed into two beds.**

**didn't solved it, it only got worse but i don't regret**

**Nothing serious happend**

**I hadn't had a difficulty**

**I did not encounter any difficulties**

**just so much tiring**

**No difficulties at all :)**

**I had no difficulty.**

**I did not encounter any difficulties**

**Honest, I didn't encounter any difficulty.**

**I didn't have any problems.**

Name two people from the HOST country (students, teachers, other) that you found especially helpful.

Ona and Valeria♥

Clara, Arnau

Arnau, Simo.

Sofia, Ona

Sofia, Alicia but not only them...

Sofia, whom has always answered our questions and Clara who was really helpful and outgoing

Simó

Ona, Clara

Arnau

Clara and Ona (students).

Sofia

Sofia and Alisia

the English teacher with long brown hair

Sofia, Clara

Some of the most helpful people from the host country was the kids that guided us to the sights and the host teachers who organized the meeting.

Sofia, Alicia, Pa

Biel and Tomas

Arnau, Ona Sophia, Pau

Everybody

I really liked Clara (student) and Sofia (teacher).

Arnau, Tomás,

Biel, Sofia, Clara,

Simó ♥♥♥

All the teachers were helpful.

Sophia, Alicia, guide of Kathedrik in the old town( I don' t remember his name)

Sofia, Alicia, Mireia

sophia teacher and andreu

ONLY TWO? OK Arnau and Thomas

tati Sofia

ruby Mira Ona, Ruben, Sofia

Sofia, Mireira, Alicia, Pau

Sofia and Ona

Sofia, Laia, clara, Ona, Cristian, and all of the amazing professors in Spain

ona, kenya, valeria

sofia and arnau

Sofia x2

Sofia and Julia

Arnau, Clara

Arnau, Sofia

Do you intend to keep in touch with any of the participants? How?

Of course I do! How couldn't I?

I already keep in touch with some of the friends I made, through social media.

yes, through social media

many of us added each other on social media and became friends

Yes, with the Spanish people.

In general with all the children from all the countries I have kept in touch because we made groups on instagram and in whats app.

Yes, by talking on social media

Yes, of course. We are always in contact and maybe we will meet this summer.

Yes I keep in touch with almost all the participants by a group chat.

I do, through texting each other

I loved Elena very much and we talked a few times after she returned to our country.

Of course :)

via instagram Probably by Instagram

We have a group chat on Instagram, we text each other and I hope we're going to meet someday

of course! via Instagram most probably

yes, i'll text them on instagram

Hopefully through whatsapp and instagram I can stay in touch with certain professors and students

Yes, through social media such as Instagram

Yes, most of them, via social networks and hopefully meet again in next projects.

No

Of course. By social media

Maybe when i'll come in Barcelona, i will call them

yes,i do. We given an instagram each other.

Of course. Via email or messenger.

Of course i intend to keep in touch with the participants because we have exchange our social media.

Yes, I'm in touch with a few Spanish and Romanian students. We text each other on Instagram.

Via WhatsApp, of course

Yeah, by texting.

We are all keeping in touch on instagram and in particular i'm gonna meet some spanish guys this summer

yes i do on instagram

Yes by social media

I'd like to - online

Yes of course, through socials

I didnt intend

Yes. Planning future activities together.

yes by means of social media

yes I do I can comunicesion with social media

## Strengths of the meeting

The speedating activity,  
meals together, the party

The active participation of students

Spanish students did a great job as our  
guides; relaxed atmosphere (no pressure,  
but everything worked out)

the last day

Amazing people

Organization, meals, host guys

Participation by all, well made presentations

I met amazing people

Breathtaking attractions, places,  
parks and monuments

We got the idea

Everything

Great job by the host professors. The city was  
beautiful fun and full of activities and sights.  
The school was also fun and welcoming.

We got to know Barcelona really well, we  
made new connections and it was just the  
most incredible experience of my life. I wish I  
could take part in something like that again  
and meet my new friends. I was talking in  
English so much that I even started thinking  
in English and that's good! 😊

People and the program

Tasty food and drinks

Friendliness of the engaged

Spanish team, relaxed  
atmosphere, good food,

Warm weather

beautiful sights

## Areas that require improvement

Nothing x5

Too much plastic and other  
resources were used for example  
during international evening

More project activities  
connected with the topic;  
more occasions for the whole  
team of teachers to meet

Number of days :DDD

integration with everyone

Too much walking per one day  
(more transport, I guess)

The parties should have been more  
eco-friendly, they shouldn't use plates,  
cups, tablecloths one-time used  
Don't be hypocritical

A little bit better time planning (slightly  
more free time and flexibility)

Generally that we walked a lot and  
maybe we would need even more  
time to bond with the other kids

more interactions with  
host students

hospitality, kind of  
manners to be tolerant

warm atmosphere and expeditions

## **Delicious food**

I loved all the meeting but especially Monday and Friday because we partied a lot and Tuesday because we get to know each other better.

people, food!!, beautiful location and weather, students doing tours, atmosphere in school, showing us

**Days full of activities**

**Great attitude/atmosphere/people**

Some of my favorite parts of the meeting was the speed dating activity, the international evening and the farewell party.

**Planning/program of activities and visits was well conducted.**

great people, beautiful place, fun ecological activities

**improving language skills**

A strong cultural component of the meeting, friendly atmosphere, involvement of the host teachers, involvement of other teachers outside the project.

**School activities Cultural exchange**

**we met new people and made new friends**

I would organize more integrative activities

**Hiking and dancing**

**I enjoyed every moment of these meeting.**

I think planting an ico-ego tree is very useful.

**last day**

The long walks were a little bit exhausting so if they were shorter it might be better.

**Guided tours and explanations were often hard to hear or confusing; a not very strong thematic component**

**More activities according to the topic of the project.**

We can do more green activities and projects together by possibly joining existing initiatives to work on in our home countries and also help with existing projects while visiting cities like Barcelona. For example we could help out at neighborhood gardens or rooftop bee hives or work on more green school projects (as we did with the videos) together.

**the program was too busy on some days**

## **Transportation**

We walked too much on Tuesday to the point where the visits weren't pleasant anymore

Maybe less sightseeing and more project work on the topic of the meeting...??
